## SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

## Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or irritation of nose, throat, and that caused by feminine ills it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At drug stores, 50c. large box, or by mail, The Paxton Toilet Co., Boston, Mass.

### Determination Wins.

Men foreordained to be great are the men who make circumstances. They never wait for them. They walk in the path no man has been on. They build their own road. Even fate will stand back when she meets the man who laughs at her frown. Determination will conquer. It must. Force is the lever which moves the world. "I will" can make the very mountains come unto you.—New York Weekly.

### Liv-ver-lax,

the liver regulator. Ask L. L. Elgin and Anderson Fowler Drug Co., Incorporated.—Advertisement.

### Longest Twelve-Word Telegram.

There were 450 competitors for the prize offered by an English journal for the longest 12-word telegram, and the winner put in the following, which was transmitted for 12 cents, the regular rate: "Administrator general's counter-revolutionary intercommunications undercircumstantiated. Quartermaster general's disproportionableness characterized by constitutionally distinguished unconstitutionality." Incomprehensibility.

## QUAKER CITY BEHIND TIMES

Statistics Show That Shoes of Philadelphia Must Frequently Lack the Proper Polish.

Philadelphia doesn't keep its shoes well polished. Washington and Boston do very much better in this particular.

A merchant who knows whereof he calculates is authority for saying the Hub buys a great deal more shoe polish than does this city of independence, and Washington surpasses the home of the baked bean.

Even without these trade statistics it would be apparent to any observer that there are more busy bootblacks in Washington and Boston than can be seen in Philadelphia. The great number of long, thin boot-shine "parlors" in those towns have no substitute here.

But Europe beats all of our towns in keeping a perennial shine on its shoe. That, I imagine, is due to the prevalence of the custom in all hostilities of having a "boots." He shines while you slumber, and I'm ready to wager that you never were able to escape from any European inn, however small, without encountering the outstretched hand of "boots."—Philadelphia Ledger.

## SURGICAL WORK MADE EASIER

Anesthetizing Machines Render Possible Operations Hitherto Scarcely Deemed Worth Thinking Of.

Machines for administering ether, chloroform or other anesthetics have been devised, which make the work of the surgeon easier and safer for the patient. An improved machine is being used in several eastern hospitals which is motor-driven and seems destined not only to simplify present methods of anesthetizing, but to open a field to surgery which heretofore has been almost beyond the reach of the knife. With the new machine it is possible to maintain normal lung pressure while the chest cavity is being explored, a problem solved as a mere by-product of mechanical anesthesia, while the patient is freed from distress as the effect of the drug wears away. Gas and air, and gas and oxygen may be given in any predetermined amount supplied by this machine. Eminent surgeons believe this method of anesthesia has a wide and varied field.—Popular Mechanics.

### HOPELESS.

"Better take this patient out of the observation ward and place him with the incurables," said the great alienist.

"But his hallucinations were not out of the ordinary," said the head of the insane asylum. "He imagined he was Napoleon. Why do you regard his case as hopeless?"

"He told me that he was the president of Mexico," replied the great alienist.

### SELF-APPRECIATION.

"King Lear is a great character," remarked the friend.

"Yes," answered the actor. "I suppose you remember my performance last season?"

"No, I confess I have never seen you in the part."

"Indeed!" was the rejoinder in a tone of gentle surprise. "Then how on earth did you know it was a great character?"—Liverpool Mercury.

### QUITE TRUE.

Patience—To fold letters and insert them in envelopes I see is the purpose of a simple hand-operated machine patented by a Georgia man.

Patrice—But you never hear of any man patenting any device to remind 'em to mail 'em.

### HABIT.

"Why has Jinks had the paths in his suburban place all such queer serpentine ones?"

"He had to have them that way to suit the walk he's learned in the city dodging autos and motorcycles."

### INTERESTING FIGURES.

"I find the professor's statistics stupid."

"I don't. He told me there were 400,000,000,000 people in the world and that I was the prettiest girl in the lot."

### HIS AFFLICTION.

"Does your husband suffer with anything like a somnolent tendency?"

"No, indeed, nothing so serious as that. He only gets sleepy all the time."

## CRAZE FOR ELEPHANT SKIN

Leather Manufacturers Are Finding It a Hard Matter to Meet the Increasing Demand.

Elephant skin is very beautiful. Moreover, it is durable. But it is hard to get.

The price of a large elephant is not small, and, besides that, elephants do not grow within a stone's throw of our front doors. So the leather manufacturer that contracted to furnish many elephant-skin bags at a given time would probably find himself under a big burden. He must wait until some tame, pet elephant, so to speak, dies.

Elephants are unusual enough, so that many of them, after they die, are stuffed and put in museums. Hence a named elephant, one that has been popular during life, will seldom fall into the hands of leather dealers. It is for the poor and wandering denizens of the circus and traveling animal shows to end up on the counters of the fashionable leather goods shops.

Such is the fate of half a dozen elephants that were overtaken in the awful floods in Indiana last spring. They were purchased by one of the famous dealers in silver and leather goods and converted into many wonderful bags and other trinkets. Among these are small elephants covered with real elephant hide, with ivory tusks, standing on little ivory slabs.

### KNEW HIM

She—He is always talking mostly about a fool.

He—S'sh! He's his own autobiographer.

### DIRIGIBLE BALLOONS.

The dirigible balloon is by no means a modern invention as many people seem to think. As a matter of fact, as long ago as 1784 General Meunier proposed the construction of an elongated balloon which might be propelled through the air. Experiments were made with it by two brothers named Robert, who made several ascents and attained a speed of three miles an hour, though the method of propulsion was only aerial oars worked by hand. Nothing further was attempted until 1852, when Henri Giffard built dirigibles which, by means of a light steam engine, he propelled at nearly seven miles an hour, and since then various experiments have been made which ultimately ended in the wonderful triumph of Zeppelin.—New York Press.

### DON'T ALL ANSWER AT ONCE.

Of course one has been hearing things all one's life, but did one ever hear of a family that moved out of a house and left it clean?

### ONE SECRET KEPT.

We once knew a girl who could keep a secret. She was engaged to a young man for three months before he suspected it.

### DRAMA OF DIRT.

Madge—The plays of today are not worth going to see.

Marjorie—But look at what you hear!—Judge.

### SWEET THING.

Fair Visitor—Oh, don't trouble to see me to the door.

Hostess—No trouble at all, dear. It's a pleasure.

### AN EXCEPTION.

"Pop, what does zero mean?"

"It means nothing, my son."

"Well, zero weather means a whole lot, don't it?"

### SUGGESTS THE MIDWAY.

He—Have you read about the fight over the Hetch Hetchy?

She—No, but I think all those moral dances ought to be stopped.
